### PROFILE

I have 8 years of experience writing web apps that span consumer productivity software to mission-critical financial trading platforms.

I have worked in full stack engineering for my entire developing career and my commitment to critical thinking and attention to detail have gotten me to where the senior full stack developer in Inmetrics company.

I am self-motivated, energetic collaborator who thrives on working in a fast-paced environment with tight deadlines and have a desire to stay updated on current and new technologies.

So I have engaged as a role of leader in this company, contributing to make a innovative result and better progress.

Due to pandemic, I had to end up my role in this company earlier and now I am working as full stack developer on upwork.

I have keen insight into what it takes to run a successful project because I have taken part in different successful projects across from startup to multi vendors.

My career goal is to have an opportunity to learn and grow my skills from a technical standpoint, and a chance to learn more skills over time. After reading the job description for this role, it sounds like this could be a good match for what I'm looking for.

I'd love to work for the company innovative and ready to expand.

- Tech stacks

React Native/Redux/Styled components/Firebase

## EDUCATION

### Belgrade Higher School, Belgrade

September 2015 — March 2019

My biggest passion is learning about software and technology. I was fascinated with computers from a young age, so I decided to study Computer Science in university and I've continued in that direction since graduating. It's been a great choice for me! As a full stack software developer, I get to shape how the internet is progressing and how websites are evolving, and that's exciting to me.

## HOBBIES

Sport (football, swimming)
